DATA ANALYTICS & TECHNICAL PROJECTS

TURO: Mentorship Mobile Application (Flutter, Dart, Figma)

- Led the front-end design and development of a capstone mobile application focused on connecting mentors and mentees.
- Created high-fidelity UI/UX prototypes in Figma and translated them into responsive, interactive interfaces using Flutter.
- Successfully deployed the application to the Apple App Store.

Tech & Threads — Mobile E-Commerce Website (React · Node.js · MySQL)

- Designed and developed a modern e-commerce website for fashion and technology products, handling the UI/UX design and frontend development.
- Built user-facing interfaces and implemented the overall shopping experience using React.

Year-Over-Year Growth Analysis of Restaurant Sales Patterns and Visualization

Business Intelligence Research Project | Data Analysis, Data Visualization

- Co-authored a research study analyzing eight years of restaurant sales data for Kenny Rogers Trece Martires.
- Utilized Microsoft Power BI to perform Year-over-Year (YoY) Growth Analysis and Seasonality Analysis.
- Identified recurring seasonal sales trends, including peak revenue during December and post-holiday declines in January.
- Analyzed the impact of COVID-19 on sales performance, identifying a 54.93% decline in 2020 and a 134.10% recovery in 2022.
- Developed visual dashboards and business recommendations to support strategic decision-making.
